

A. Clinical studies have proven the efficacy and persistence of Hibiclens® Antiseptic/Antimicrobial Skin Cleanser. A recent study* demonstrated this by using agar plates inoculated with Staph aureus. Hands were washed daily for five days with Hibiclens, and then pressed onto the inoculated plates – palms down. The plates were then incubated and a whitish Staph aureus lawn grew in areas unaffected by antiseptic activity. Hand prints on plates touched by Hibiclens-washed hands remained clear and unaffected by the whitish Staph aureus lawn, showing immediate kill and a cumulative effect that didn't know when to quit. In fact, this demonstration showed that Hibiclens was still killing on the fifth day of use - 6 hours **after** the final daily hand wash.

A.

Hibiclens® keeps working even when you're not.

Persistent, antiseptic activity that doesn't know when to quit.

A recent study has proven that Hibiclens, a trusted leader in antimicrobial cleansers, kills germs on contact, and continues to lower hand microbial counts with repeated use. Its 4% chlorhexidine gluconate (CHG) formulation bonds with skin to create a germ-killing field that keeps killing long after your shift has ended. Hibiclens gives you the peace of mind you can depend upon, even after you're done working.

HIBICLENS®
Antiseptic / Antimicrobial Skin Cleanser

Hibiclens® keeps working even when you're not.

The instant, long-lasting cleanser that's easy on your skin.

A recent study* has shown the CHG formula in Hibiclens® continues working much longer than the active ingredients found in most other leading cleansers. Hibiclens, with its 4% CHG formula, immediately goes to work on bacteria, bonding with skin to sustain its antimicrobial protection long after the shift is over. And, with repeated use, the Hibiclens bond continues to lower hand microbial counts. Gentle and non-drying, Hibiclens is compatible with the normal pH of the skin and ideal for use several times a day.

Broad spectrum activity • Fast acting • Long-lasting

Passion: Proven

Regent Medical continues to set the standard in the industry by meeting the ever-changing needs of healthcare professionals. Our commitment to ongoing education and research stems from our passion for protecting the best.

HIBICLENS®
Antiseptic / Antimicrobial Skin Cleanser

Hibiclens® even outlasts other antiseptic skin cleansers.

In a recent study,* the 4% CHG formulation of Hibiclens was compared to the active ingredients of several other antiseptic skin cleansers. Hibiclens showed rapid antimicrobial activity and a germ-killing bond that kept working long after the others called it quits. In fact, the cumulative effect of Hibiclens was still clearly evident on the fifth day of use, 6 hours after the final daily handwash.

Compare Hibiclens's cumulative effect on bacteria to other leading formulations.

Hibiclens®
Day 5, 6 hours after use

61% Ethyl Alcohol in 1% CHG in Scrub
Day 5, 6 hours after use

Povidone Iodine Scrub
Day 5, 6 hours after use

PCMX Scrub
Day 5, 6 hours after use

70% Ethyl Alcohol Scrub
Day 5, 6 hours after use

Drug Facts

Active Ingredient.....Purpose
Chlorhexidine gluconate solution 4.0% w/v.....Antiseptic

Uses

- antimicrobial skin cleanser helps reduce bacteria that potentially can cause disease
- skin wound and general skin cleansing
- surgical hand scrub
- personnel hand wash
- preoperative skin preparation

Warnings

For external use only

Do not use:

- if you are allergic to chlorhexidine gluconate or any other ingredients in this preparation
- as a patient preoperative skin cleanser of the head or face
- in contact with the meninges
- in the genital area
- on wounds that involve more than the superficial layers of the skin

When using this product:

- keep out of the eyes, ears and mouth. May cause serious and permanent eye injury if placed or kept in the eye during surgical procedures, or may cause deafness when instilled in the middle ear through perforated ear drums.
- if contact occurs in any of these areas, rinse with cold water right away.

Stop use and ask a doctor if:

- irritation, sensitization, or allergic reaction occurs and last for 72 hours. These may be signs of a serious condition.

Keep out of reach of children

If swallowed, get medical help or contact a Poison Control Center right away.

Directions

- Skin wound and general skin cleansing. Thoroughly rinse the area to be cleansed with water. Apply the minimum amount of HIBICLENS necessary to cover the skin or wound area and wash gently. Rinse thoroughly.
- Surgical hand scrub. Wet hands and forearms with water. Scrub for 3 minutes with about 5mL of HIBICLENS and a wet brush. Rinse thoroughly under running water. Repeat. Dry thoroughly.

- Personnel hand wash. Wet hands with water. Dispense about 5mL of HIBICLENS into cupped hands and wash in a vigorous manner for 15 seconds. Rinse and dry thoroughly.
- Preoperative skin preparation. Apply HIBICLENS liberally to surgical site and swab for at least 2 minutes. Dry with a sterile towel. Repeat. Dry with a sterile towel.

Other information

Store between 20-25°C (68-77°F)

Laundering Instructions

Chlorhexidine gluconate skin cleansers will cause stains if used with chlorinated products. Rinse completely and use only non-chlorine detergents. See website for more details.

Inactive Ingredients

Fragrance, isopropyl alcohol 4% w/v, purified water, Red 40, and other ingredients in a nonalkaline base.
